Typography

In order to achieve a consistent branding of the project in various applicational cases, the use of the following fonts is recommended. While the **Calibri** font is used on most machines, it should be seen as a default. More sophisticated designs can be supplemented with the **Baloo 2** font, which is freely available.

Baloo 2

Regular
Medium
Semibold
Bold
Extrabold

This font is recommended as a display font, e.g. for headings but also works well in smaller text. The fonts is licensed under the Open Font License and is part of the google web library.

Calibri

Light
Regular
Bold

This font is recommended for display purposes when Baloo 2 is not available. Furthermore, the Calibri typeface provides good readibility even in longer texts. It should also be used as the default typeface for office use cases, as it is installed on most Win and Mac machines.
